Q.41 Which of the following is/are the correct conclusion(s) from Oersted's experiment?

- (a) A magnetic compass needle placed along the side of a current carrying conductor deflects
- (b) A current carrying conductor will produce magnetic field around it.
- (c) The direction of deflection of the compass needle placed along the side of a current carrying conductor does not change with reversal in the direction of current.

- Ans
- 1. Only (a) and (b) are correct
  - 2. Only (c) and (a) are correct
  - 3. Only (b) and (c) are correct
  - 4. (a), (b) and (c) are correct
