Q.3 Choose the most logical order of the sentences from among the four given choices to construct a coherent paragraph.

The 20th century has been marked by remarkable scientific progress, revolutionizing the way we transport ourselves and communicate with each other. While the Renaissance gave us an intellectual revolution and the 18th century an industrial revolution, the 20th century has been defined by scientific advancements.

A) Additionally, the invention of the jet engine by Sir Frank Whittle has revolutionized air travel, allowing planes to travel at incredible speeds and heights.

B) In conclusion, the scientific revolution of the 20th century has brought about incredible advancements in transport and communication. From rocketry and jet engines to radio-telephones and television, these technologies have transformed the way we live and interact with each other.

C) From rocketry and nuclear power to the jet engine and satellite communication, the progress of the past century has been truly transformative.

D) When it comes to transport, perhaps the most significant development has been in rocketry. The United States and the USSR have both achieved the incredible feat of putting humans into orbit and launching scientific satellites that can send data back to Earth.

Ans ☒ 1. ABCD

☒ 2. CBAD

☒ 3. DACB

☒ 4. CDAB

Q.20 Choose the most logical order of the sentences from among the four given choices to construct a coherent paragraph.

The saying, "it pays to advertise," still holds true today. Advertising not only helps to sell goods and services, but it also creates a demand for new products.

A) Advertising is a vital part of modern society, and its development can be traced back at least three centuries to the publication of early journals like The London Gazette, Tatler, and Spectator in England.

B) The competition among big producers in the home computer industry is a prime example of this.

C) Advertising began on a local basis, and as the factors like mass-production, rail communication, transport, and printing developed, it expanded to a national and international level.

D) Advertising is everywhere the public goes: on walls, shop fronts, hoardings, railway stations, buses, business vehicles, and more.

- Ans ☒ 1. CBAD
☒ 2. BACD
☒ 3. ABCD
☒ 4. DACB

 Status : Answered
 Chosen Option : 4

Comprehension:

Read the following passage and answer the given questions:

From ancient times to the present day, human beings have always craved entertainment. Whether it be Greek tragedy and comedy in open-air amphitheaters or shadow and puppet plays in the East, people have always sought out ways to be amused and distracted from their daily lives. However, the nature of entertainment has evolved over time and has become a highly organized business in most modern countries, offering an overwhelming variety of options to satisfy every possible taste.

Unlike activities such as indoor games or amateur theatricals, entertainment implies non-participation by the audience. From cabaret to ballet, from radio and television to the opera and the circus, from the cinema to the variety show, and from the comedian to the symphony concert, modern entertainment provides a wide array of choices that appeal to people of all ages and backgrounds. In multicultural cities like Singapore, traditional performances from different races add to the diverse mix of entertainment offerings.

The glamour and glitter of the entertainment industry are especially attractive to young people. The famous "pop" stars of today become idols for adolescents who emulate their fashion sense and dream of achieving fame and fortune themselves. However, only a small minority of talented hopefuls succeed in breaking into the world of entertainment. Even for those who do, the real challenge lies in staying relevant and innovative. Television is a voracious consumer of scripts, and comedians cannot afford to repeat the same jokes twice. Achieving long-term success in entertainment demands rigorous training and consistent hard work, whether in a drama or ballet school, a music academy, or as part of a professional script-writing team.

In conclusion, the world of entertainment has an enduring appeal that transcends time and culture. From ancient Greek amphitheaters to modern-day cinema and television, people have always sought out ways to be entertained. While the industry has become more complex and competitive, it still provides opportunities for talented individuals to showcase their skills and achieve success. Despite the hardships and challenges that come with the profession, the world of entertainment remains an irresistible force that continues to captivate and inspire audiences around the world.
