Q.3 Five friends are sitting in a row facing the south direction. Among them, Suraj is between Rakesh and Sundar, Sundar is to the intermediate right of Manoj. In the same way, Alok is to the right of Rakesh. Who is at the extreme end?

- Ans** ☒ 1. Alok
☒ 2. Rakesh
☒ 3. Suraj
☒ 4. Sundar

Question ID : 630680369858
 Option 1 ID : 6306801440825
 Option 2 ID : 6306801440826
 Option 3 ID : 6306801440828
 Option 4 ID : 6306801440827
 Status : Answered
 Chosen Option : 1

Q.4 Which will replace the question mark?
 2,4,6,8,10,.....?

- Ans** ☒ 1. 12
☒ 2. 20
☒ 3. 22
☒ 4. 18

Question ID : 630680369879
 Option 1 ID : 6306801440911
 Option 2 ID : 6306801440912
 Option 3 ID : 6306801440909
 Option 4 ID : 6306801440910
 Status : Answered
 Chosen Option : 1

Q.5 Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statement(s).

Statements:
 Some oxen are cows.
 All cows are horses.

Conclusions:
 1. No oxen are cows.
 2. Some oxen are horses.

- Ans** ☒ 1. Both conclusions 1 and 2 follow
☒ 2. Only conclusion 2 follows
☒ 3. Neither conclusion 1 nor 2 follows
☒ 4. Only conclusion 1 follows

Question ID : 630680369863
 Option 1 ID : 6306801440847
 Option 2 ID : 6306801440846
 Option 3 ID : 6306801440848

Chosen Option : 2

Comprehension:

Read the given passage and answer the questions that follow.

A recent report by the United Nations' Food and Agriculture Organization (FAO), Duke University and WorldFish found that small-scale fisheries account for 40% of the global fishery catch. Between 2013 and 2017, Asia contributed approximately 23 of the 37 million tonnes caught, highlighting the importance of such enterprises for livelihoods and nutrition, particularly in Asia and for women. The fishing in this sector involves low-tech and low-cost family or community fishing along the coast and rivers with the catch most commonly sold in local markets. The report is the most comprehensive look at small-scale fisheries, based on data from 58 countries and territories, and involving 800 researchers, government officials, and consultants.

The study found that the average economic value of annual landings from 2013 to 2017 was almost US\$77.2 billion globally, or 49% more than in the first study conducted in 2012. The small-scale fisheries generated about 44% of the total economic value of catches in the countries surveyed. In India, small-scale fishing generates an average annual landing value between \$1-4.3 billion, compared to over \$4.3 billion in the US. It is estimated that around 10-25% of the marine catch comes from small-scale fisheries.

Small-scale fisheries account for nearly 90% of global fisheries employment, with 60.2 million people employed full-time in the value chain in 2016, compared to 7.3 million in large-scale fisheries. These estimates were extrapolated from 78 national household surveys. China leads the industry with 35.5 million people employed in the sector, followed by India with 13.1 million. The sector is also a significant employer for women, with an estimated 44.7 million women participating in value chains or engaged in livelihood activities related to the sector, representing 40% of people involved in the sector.

SubQuestion No : 22

Q.22 60.2 million people were employed full time in the small-scale fisheries _____ in 2016.

Ans ☒ 1. across the world

☐ 2. in India and China

☐ 3. in Asia

☐ 4. in China alone
